

Cheat Sheet: Insect Repellents That Work!

No matter the brand, look for any **one** of the following ingredients. They're registered with the U.S. Environmental Protection Agency and recommended by the Centers for Disease Control and Prevention.

DEET

Repellents containing DEET are available in a variety of forms. DEET is considered one of the most effective and popular ingredients to use against mosquitoes and other biting insects.

For Children: Over 2 Months

Oil of Lemon Eucalyptus

This is a natural plant-based repellent that is available as pump sprays and lotions.

Oil of lemon eucalyptus repellents provide similar protection to that of products containing DEET.

For Children: Over 3 years

Picaridin

For many people, Picaridin is an effective alternative to DEET. Picaridin is generally odorless and colorless, allowing many brands to offer pleasantly-scented options.

For Children: Over 2 Months

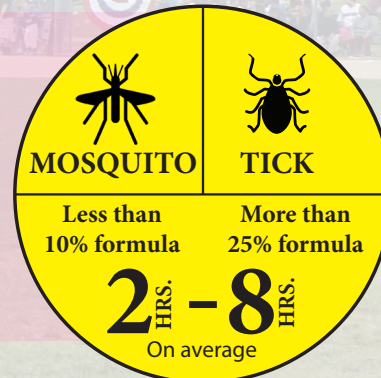

IR3535

Repellents containing IR3535 are available as aerosol, pump sprays and wipes. Be advised that this formula is an eye irritant.

For Children: Over 6 Months

Always follow label instructions when applying!
