

# Protect Your Residents by Eliminating Stagnant Water Sources

## Did You Know:

Mosquitoes in this area can spread **West Nile virus** with one bite.

Mosquitoes can fly out of everyday containers that hold stagnant water.

Improve your residents quality of life:  
**TIP** out the water and **TOSS** out the source.

Small Containers

Indoor Plants

Water Fountains

Buckets

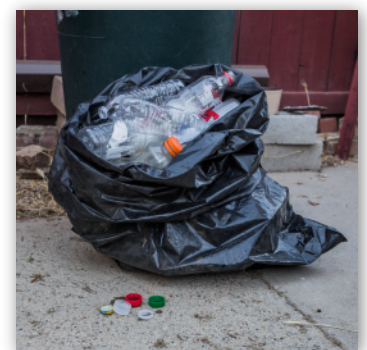

Pet Bowls

Plant Saucers

Street Gutters

Recyclables

Protecting the Public from  
Vector-Borne Diseases since 1989
